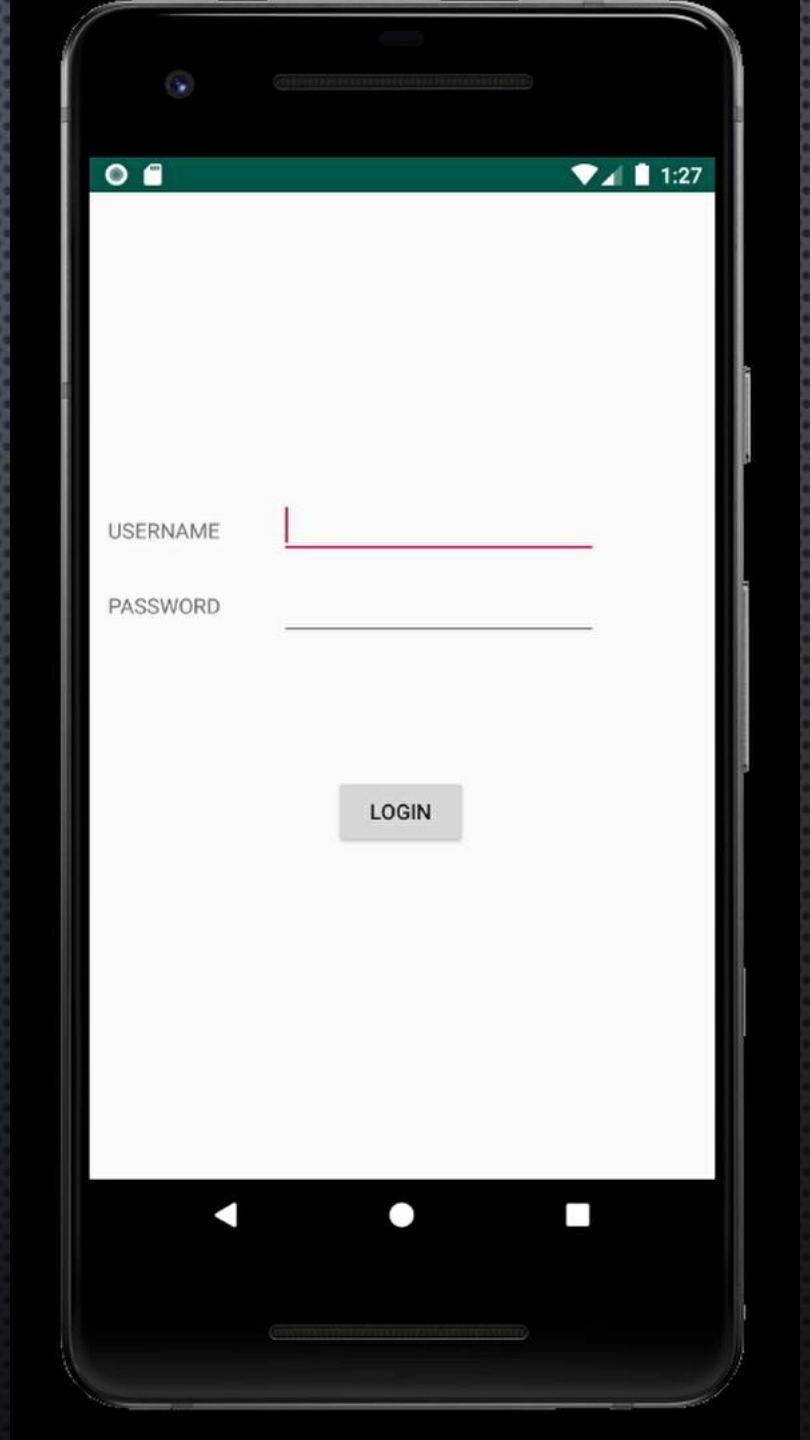
3. VIDEO DEMO OF MUSIC APP



4. PERSONAL **REFLECTION**

In general, I found this project to be positive.

I felt that this project has shown me that coding is not easy and requires a lot of research and understanding before implementing a simple task. This also made me have more respect for app developers. The amount of effort to make apps and debug really takes a lot of skills.

I enjoyed the trial and error experience and learning how to debug our own programmes.

This whole assignment is a 4/5 as it really is an eye opener to this industry.

THANK YOU !
